Therapeutic Resource Centers

---

# A pharmacy you can count on

Accredo is a specialty pharmacy that must be used to fill certain specialty medications in order for them to be covered as part of your health plan's pharmacy benefit. Accredo offers you support that goes beyond filling prescriptions. You'll have a team by your side who understands the complex health conditions. They're here to lend a hand whenever you need one.

---

## Care that goes beyond medication management

Accredo's Therapeutic Resource Centers (TRCs) are what sets it apart from other specialty pharmacies. They'll put you in touch with the right TRC for your specific condition. Accredo pharmacists and nurses will look at your care from a comprehensive standpoint, too.

### Getting your prescriptions

You can rest assured knowing your medications are handled with care, especially if they need refrigeration. Accredo can transfer prescriptions and set up home delivery. In some cases, a nurse can help administer your medication from the comfort of your own home. Accredo can also provide certain specialty medications at a discounted rate.

### Manage your meds with one click

Digital tools are available to help manage your medications and condition. Use the Accredo app or visit [accredo.com](https://www.accredo.com) to:

- Order refills.
- Set reminders.
- Check on an order.

Download the Accredo app from the [App Store](#) or [Google Play](#).

### Personalized customer service

Your team is available 24/7 to answer questions. They provide one-on-one support and can contact you via email, phone, or text — it's completely up to you. Think of it as personalized customer service, so you can manage your condition when and how you want.

Accredo provides support and care for a wide range of complex conditions, including:

- Bleeding disorders
- Cancer
- Cardiovascular diseases
- Cystic fibrosis
- Endocrine conditions
- Hepatitis C
- Hereditary angioedema
- Immune disorders
- Infertility
- Multiple sclerosis
- Pulmonary arterial hypertension
- Rare diseases
- Rheumatoid arthritis and inflammatory conditions
